AUTHOR INDEX

Volumes 112, 113, 114, and 115, 1998

ADOMEIT, G.: see Reinelt, D.

AGRAWAL, A. K.: see Bi, H.

AGRAWAL, J. P., WALLEY, S. M., and FIELD, J. E.
A High-Speed Photographic Study of the Impact Initiation of Hexanitro-Hexaaza-Isowurtzitane and Nitrotriazolone, 112: 62

AGRAWAL, S.: see Atreya, A.

AHARON, I., and SHAW, B. D.
Estimates of Liquid Species Diffusivities from Experiments on Reduced-Gravity Combustion of Heptane–Hexadecane Droplets, 113: 507

ALDREDGE, R. C., VAEZI, V., and RONNEY, P. D.
Premixed-Flame Propagation in Turbulent Taylor-Couette Flow, 115: 395

ALEXANDER, D. R.: see Ma, J. X.

ALLEN, M. T., YETTER, R. A., and DRYER, F. L.
Hydrogen/Nitrous Oxide Kinetics—Implications of the $_NH_Y$ Species, 112: 302

ALZUETA, M. U.: see Glarborg, P.

ÅMAND, L.-E.: see Stenberg, J.

AMYOTTE, P. R.: see Reddy, P. D.

ANDERSON, J. D., JR.: see Oran, E. S.

ANTAKI, P. J.
Importance of Non-Fourier Heat Conduction in Solid-Phase Reactions, 112: 329

ARAKI, N.: see Makino, A.

ARISAWA, H., and BRILL, T. B.
Thermal Decomposition of Energetic Materials 71: Structure-Decomposition and Kinetic Relationships in Flash Pyrolysis of Glycidyl Azide Poymer (GAP), 112: 533

ATREYA, A., and AGRAWAL, S.
Effect of Radiative Heat Loss on Diffusion Flames in Quiescent Microgravity Atmosphere, 115: 372

AUNG, K. T.: see Hassan, M. I.

AUNG, K. T., HASSAN, M. I., and FAETH, G. M.
Response to Comment by T. J. Poinsot on "Flame Stretch Interactions of Laminar Premixed Hydrogen/Air Flames at Normal Temperature and Pressure", 113: 284

AUNG, K. T., HASSAN, M. I., and FAETH, G. M.
Effects of Pressure and Nitrogen Dilution on Flame/Stretch Interactions of Laminar Premixed $H_2/O_2/N_2$ Flames, 112: 1

AXFORD, S. D. T., GOODINGS, J. M., and HAYHURST, A. N.
Mass-Spectrometric Sampling of Ions from Flames at Atmospheric Pressure: The Effects of Applied Electric Fields and the Variation of Electric Potential in a Flame, 114: 294

BABUSHOK, V.: see Linteris, G. T.

BABUSHOK, V.: see Noto, T. 147

BABUSHOK, V., TSANG, W., LINTERIS, G. T., and REINELT, D.
Chemical Limits to Flame Inhibition, 115: 116

BAI, X. S.: see Seshadri, K.

BAILLOT, F.: see Bourehla, A.

BALLESTER, J.: see Blasco, J. A.

BANIN, V. E.: see Commissaris, F. A. C. M.

BARBINI, M.: see De Iuliis, S.

BARITAUD, T., POINSOT, T., and BAUM, M.
T. Baritaud, T. Poinsot, and M. Basum, *Direct Numerical Simulation for Turbulent Reacting Flows* (Book Review), 113: 277

BARLOW, R. S.: see Dally, B. B.

BAR-ZIV, E.: see Kantorovich, I. I.

BAR-ZIV, E.: see Zhang, X.

BATTIN-LECLERC, F.: see Warth, V.

BAUM, M.: see Baritaud, T.

BAUM, R. T., MCGRATTAN, K. B., and NYDEN, M. R.
An Examination of the Applicability of Computed Tomography for the Measurement of Component Concentrations in Fire-Generated Plumes, 113: 358

BECKER, H. A.: see Grandmaison, E. W.

BECKER, H. A.: see Sobesiak, A.

BECKWITH, P.: see Stone, R.

BEDIR, H.: see Rhatigan, J. L.

BEN-DOR, G.: see Li, H.

BENECCHI, S.: see De Iuliis, S.

BERG, P. A.: see Tamura, M.

BHARGAVA, A., and WESTMORELAND, P. R.
MBMS Analysis of a Fuel-Lean Ethylene Flame, 115: 14

BHARGAVA, A., and WESTMORELAND, P. R.
Measured Flame structure and Kinetics in a Fuel-Rich Ethylene Flame, 113: 333

BI, H., and AGRAWAL, A. J.
Study of Autoignition of Natural Gas in Diesel Environments Using Computational

Fluid Dynamics with Detailed Chemical Kinetics, 113: 289

BIELERT, U., and SICHEL, M.
Numerical Simulation of Premixed Combustion Processes in Closed Tubes, 114: 397

BLASCO, J. A., FUEYO, N., DOPAZO, C., and BALLESTER, J.
Modelling the Temporal Evolution of a Reduced Combustion Chemical System With an Artificial Neural Network, 113: 38

BLIN-SIMIAND, N., JORAND, F., KELLER, K., FIDERER, M., and SAHETCHIAN, K.
Ketohydroperoxides and Ignition Delay in Internal Combustion Engines, 112: 278

BLOCK, B., HENTSCHEL, W., and ERTMER, W.
Pyrometric Determination of Temperature in Rich Flames and Wavelength Dependence of Their Emissivity, 114: 359

BOLLIG, M.: see Muller, U. C.

BORTHWICK, P.: see Hamins, A.

BOULTON, D.: see Clifford, L. J.

BOUREHLA, A., and BAILLOT, F.
Appearance and Stability of a Laminar Conical Premixed Flame Subjected to an Acoustic Perturbation, 114: 303

BOWMAN, C. T.: see Woiki, D.

BRADLEY, D., GASKELL, P. H., GU, X. J., LAWES, M., and SCOTT, M. J.
Premixed Turbulent Flame Instability and NO Formation in a Lean-Burn Swirl Burner, 115: 80

BRADLEY, D., HICKS, R. A., LAWES, M., SHEPPARD, C. G. W., and WOOLLEY, R.
The Measurement of Laminar Burning Velocities and Markstein Numbers for Iso-octane–Air and Iso- octane–*n*-Heptane–Air Mixtures at Elevated Temperatures and Pressures in an Explosion Bomb, 115: 126

BRAY, K. N. C., CHAMPION, M., and LIBBY, P. A.
Premixed Flames in Stagnating Turbulence Part II. The Mean Velocities and Pressure and the Damköhler Number, 112: 635

BREWSTER, B. S.: see Cannon, S. M.

BREWSTER, M. Q.: see Ward, M. J.

BRILL, T. B.: see Arisawa, H.

BRILL, T. B.: see Gongwer, P. E.

BRILL, T. B.: see Williams, G. K.

BROADWELL, J. E., and LUTZ, A. E.
A Turbulent Jet Chemical Reaction Model: NO_x Production in Jet Flames, 114: 319

BROWN, R. C.: see Yetter, R. A.

BROWN, R. C.: see Zhou, W.

BRUEL, P.: see Sabel'nikov, V. A.

BUCKMASTER, J.: see Vedarajan, T. G.

BURELBACH, J. P., EPSTEIN, M., and PLYS, M. G.
Initiation of Flame Spreading on Shallow Subflash Fuel Layers, 114: 280

BURGESS, D. R., JR.: see Linteris, G. T.

BURKE, M. L., and ZITTEL, P. F.
Laboratory Generation of Free Chlorine from HCl under Stratospheric Afterburning Conditions, 112: 210

BUTLER, C. J., and HAYHURST, A. N.
Measurements of the Concentrations of Free Hydrogen Atoms in Flames from Observations of Ions: Correlation of Burning Velocities with Concentrations of Free Hydrogen Atoms, 115: 241

BYCHKOV, V. V., KLEEV, A. I., and LIBERMAN, M. A.
A Thin Front Model Applied to Flame Propagation in Tubes, 113: 470

CADMAN, P.: see Wang, R.

CADOU, C. P.: see Pont, G.

CANDEL, S.: see Thibaut, D.

CANNON, S. M., BREWSTER, B. S. and SMOOT, L. D.
Stochastic Modeling of CO and NO in Premixed Methane Combustions, 113: 135

CARRIER, G. F., FENDELL, F. E., and FINK, S. F., IV.
Air Dilution, Under Calm, of Spreading Dense Vapor from an Instantaneous Spill of Volatile Liquid, 114: 178

CARVALHO, M.: see Meunier, P.

CASTALDI, M. J.: see Marinov, N. M.

CASTANO, F.: see Husain, D.

CATHONNET, M.: see Dagaut, P.

CHAMPION, M.: see Bray, K. N. C.

CHAN, S. H., YIN, J. Q., and SHI, B. J.
Structure and Extinction of Methane–Air Flamelet with Radiation and Detailed Chemical Kinetic Mechanism, 112: 445

CHANG, C.-C.: see Chen, Y.-C.

CHANG, H.-C.: see Dobbins, R. A.

CHELLIAH, H. K.: see Lentati, A. M.

CHEN, J. H.: see Echekki, T.

CHEN, J.-Y.: see Chou, C.-P.

CHEN, R.-H.
A Parametric Study of NO_2 Emission from Turbulent H_2 and CH_4 Jet Diffusion Flames, 112: 188

CHEN, Y.-C., CHANG, C.-C., PAN, K.-L., and YANG, J.-T.
Flame Lift-off and Stabilization Mechanisms of Nonpremixed Jet Flames on a Bluff-Body Burner, 115: 51

CHENG, L.: see Taylor, P. H.

CHENG, R. K.: see Johnson, M. R.

CHERNYSCHEV, A. W.: see Vaulina, O. S.
CHOI, C. R., and HUH, K. Y.
Development of a Coherent Flamelet Model for a Spark-Ignited Turbulent Premixed Flame in a Closed Vessel, 114: 336
CHOI, M. Y., and JENSEN, K. A.
Calibration and Correction of Laser-Induced Incandescence for Soot Volume Fraction Measurements, 112: 485
CHOU, C.-P., CHEN, J.-Y., YAM, C. G., and MARX, K. D.
Numerical Modeling of NO Formation in Laminar Bunsen Flames—A Flamelet Approach, 114: 420
CHUNG, S. H.: see Gil, Y. S.
CHUNG, S. H.: see Sohn, C. H.
CIAJOLO, A., and D'ANNA, A.
Controlling Steps in the Low-Temperature Oxidation of n-Heptane and iso-Octane, 112: 617
CIGNOLI, F.: see De Iuliis, S.
CLARKE, A.: see Stone, R.
CLELAND, J. G.: see Ouedraogo, A.
CLIFFORD, L. J., MILNE, A. M., TURÁNYI, T., and BOULTON, D.
An Induction Parameter Model for Shock-Induced Hydrogen Combustion Simulations, 113: 106
CÔME, G.: see Warth, V.
COMMISSARIS, F. A. C. M., BANIN, V. E., and ROEKAERTS, D. J. E. M.
The Rates of Production of CO and CO_2 from the Combustion of Pulverized Coal Particles in a Shock Tube, 112: 121
COOK, A. W., and RILEY, J. J.
Subgrid-Scale Modeling for Turbulent Reacting Flows, 112: 593
CORVELLEC, C.: see Sabel'nikov, V. A.
COSTA, M.: see Meunier, P.
CROISET, E., HEURTEBISE, C., ROUAN, J.-P., and RICHARD, J.-R.
Influence of Pressure on the Heterogeneous Formation and Destruction of Nitrogen Oxides during Char Combustion, 112: 33
CROSLEY, D. R.: see Tamura, M.
CURRAN, H. J., GAFFURI, P., PITZ, W. J., and WESTBROOK, C. K.
A Comprehensive Modeling Study of *n*-Heptane Oxidation, 114: 149

DAGAUT, P., and CATHONNET, M.
A Comparative Study of the Kinetics of Benzene Formation from Unsaturated C_2 to C_4 Hydrocarbons, 113: 620
DAHM, W. J. A.: see Hsieh, T.-C. A.
DALLY, B. B., MASRI, A. R., BARLOW, R. S., and FIECHTNER, G. J.
Instantaneous and Mean Compositional Structure of Bluff-Body Stabilized Nonpremixed Flames, 114: 119
DAM-JOHANSEN, K.: see Glarborg, P.
DANCEY, C. L.: see Pellett, G. L.
D'ANNA, A.: see Ciajolo, A.
DAOU, J.
Ignition and Combustion of Fuel Pockets Moving in an Oxidizing Atmosphere, 115: 383
DAOU, J., and ROGG, B.
Convective Burning of Gaseous Fuel Pockets and Supercritical Droplets, 115: 145
DAVIDSON, D. F.: see Woiki, D.
DEBRUYNKOPS, S. M., and RILEY, J. J.
Scalar Transport Characteristics of the Linear-Eddy Model, 112: 253
DE IULIIS, S., BARBINI, M., BENECCHI, S., CIGNOLI, F., and ZIZAK, G.
Determination of the Soot Volume Fraction in an Ethylene Diffusion Flame by Multiwavelength Analysis of Soot Radiation, 115: 253
DELLINGER, B.: see Taylor, P. H.
DESHAIES, B.: see Sabel'nikov, V.
DINARO, J. L.: see Phenix, B. D.
DÖBBELING, K.: see Polifke, W.
DOBBINS, R. A., FLETCHER, R. A., and CHANG, H.-C.
The Evolution of Soot Precursor Particles in a Diffusion Flame, 115: 285
DOPAZO, C.: see Blasco, J. A.
DRAKE, M.: see Mueller, C. J.
DREIZIN, E. L.: see Molodetsky, I. E.

A Quasi-Global Mechanism for Oxidation of Fuel Oil and the Laminar Flame Data Library, 113: 615

SUBJECT INDEX

Volumes 112, 113, 114, 115, 1998

1. ASYMPTOTIC ANALYSES

Asymptotic Analysis of the Structure of Moderately Rich Methane–Air Flames, 113: 589

The Measurement of Laminar Burning Velocities and Markstein Numbers for Iso-octane–Air and Iso-octane–*n*-Heptane–Air Mixtures at Elevated Temperatures and Pressures in an Explosion Bomb, 115: 126

Rate–Ratio Asymptotic Analysis of Inhibition of Nonpremixed Methane–Air Flames by CF_3Br, 112: 418

2. COMBUSTION IN PRACTICAL SYSTEMS

Control of NO_x Emissions in Confined Flames by Oscillations, 113: 13

Correlations for the Laminar-Burning Velocity of Methane/Diluent/Air Mixtures Obtained in Free-Fall Experiments, 114: 456

Emissions Reduction and Pyrolysis Gas Destruction in an Acoustically Driven Dump Combustor, 113: 249

Flame Lift-off and Stabilization Mechanisms of Nonpremixed Jet Flames on a Bluff-Body Burner, 115: 51

The Evolution of Soot Precursor Particles in a Diffusion Flame, 115: 285

H_2O_2-Assisted Regeneration of Diesel Particulate Traps at Typical Exhaust Gas Temperatures, 115: 28

Ignition and Combustion of a Packed Bed in a Stagnation Point Flow Part II: Heterogeneous and Homogenous Reactions, 113: 373

Ketohydroperoxides and Ignition Delay in Internal Combustion Engines, 112: 278

Laboratory Generation of Free Chlorine from HCl under Stratospheric Afterburning Conditions, 112: 210

Laser-Induced Fluorescence, Mass Spectrometric, and Modeling Studies of Neat and NH_3-Doped H_2/N_2O/Ar Flames, 115: 313

Laser Spark Ignition and Combustion Characteristics of Methane–Air Mixtures, 112: 492

Measurements of Gas Concentrations in a Fluidized Bed Combustor Using Laser-Induced Photoacoustic Spectroscopy and Zirconia-Cell Probes, 113: 477

Mechanisms of Combustion Wave Propagation in Heterogeneous Reaction Systems, 115: 354

Mixture of Triethylamine (TEA) and Benzene as a New Seeding Material for the Quantitative Two-Dimensional Laser-Induced Exciplex Fluorescence Imaging of Vapor and Liquid Fuel Inside SI Engines, 112: 199

Performance Characteristics of the Novel Low-NO_x CGRI Burner for Use With High Air Preheat, 115: 93

Premixed Flame Stabilization in an Axisymmetric Curved-Wall Jet, 113: 348

A Quasi-Global Mechanism for Oxidation of Fuel Oil and the Laminar Flame Data Library, 113: 615

Scaling Laws for NO_x Emission Performance of Burners and Furnaces from 30kW to 12 MW, 114: 54

Soot Morphology in a Liquid-Fueled, Swirl-Stabilized Combustor, 112: 312

The Strong-Jet/Weak Jet Problem and Aerodynamic Modeling of the CGRI Burner, 114: 381

Study of Autoignition of Natural Gas in Diesel Environments Using Computational Fluid Dynamics with Detailed Chemical Kinetics, 113: 289

Trends of NO Formation in Low-Temperature Hydrocarbon Flames, 112: 275

3. COMBUSTION STABILITY/INSTABILITY

Appearance and Stability of a Laminar Conical Premixed Flame Subjected to an Acoustic Perturbation, 114: 303

Premixed Turbulent Flame Instability and NO Formation in a Lean-Burn Swirl Burner, 115: 80

4. COMBUSTION SYSTEMS: ANALYTIC AND NUMERICAL DESCRIPTIONS
Accounting for Reactant Consumption in the Thermal Explosion Problem III: Criticality Conditions for the Arrhenius Problem, 113: 212
Air Dilution, Under Calm, of Spreading Dense Vapor from an Instantaneous Spill of Volatile Liquid, 114: 178
Analysis of the Influence of Cold Front Quenching on the Turbulent Burning Velocity Associated with an Eddy Break-Up Model, 113: 492
Approximation for Burning Velocities and Markstein Numbers for Lean Hydrocarbon and Methanol Flames, Combustion and Flame 108: 349–356 (1997) (Erratum), 112: 284
Comments on "Flame Stretch Interactions of Laminar Premixed Hydrogen Air Flames at Normal Temperature and Pressure" by K. T. Aung, M. J. Hassan, and G. M. Faeth, 113: 279
A Comparison of Scalar PDF Turbulent Combustion Models, 113: 442
A Consistent Flamelet Formulation for Non-Premixed Combustion Considering Differential Diffusion Effects, 114: 26
Convective Burning of Gaseous Fuel Pockets and Supercritical Droplets, 115: 145
Dynamics and Structure of Interacting Nonpremixed Flames, 115: 180
Dynamics of Water Droplets in a Counterflow Field and their Effect on Flame Extinction, 115: 158
Edge-Flames in Homogeneous Mixtures, 114: 267
Effect of Fluorine on the Combustion of "Clean" Surface Boron Particles, 112: 507
The Effect of Mixing Irregularities on Mixed-Region Critical Length for Deflagration-to-Detonation Transition, 115: 38
Effects of Pressure and Nitrogen Dilution on Flame/Stretch Interactions of Laminar Premixed $H_2/O_2/N_2$ Flames, 112: 1
Effects of the Lewis Number of Water Vapor on the Combustion and Extinction of Methanol Drops, 112: 113
Effects of Thermal Boundary Conditions on Flame Shape and Quenching in Ducts, 112: 73
The Evolution of Soot Precursor Particles in a Diffusion Flame, 115: 285
Flame Bifurcations and Flammable Regions of Radiative Counterflow Premixed Flames with General Lewis Numbers, 113: 603
Hydrodynamic Instability in an Extended Landau/Levich Model of Liquid-Propellant Combustion at Normal and Reduced Gravity, 113: 406
Hydroxyl Time-Series Measurements in Laminar and Moderately Turbulent Methane/Air Diffusion Flames, 115: 1
Ignition in Nonpremixed Counterflowing Hydrogen versus Heated Air: Computational Study with Skeletal and Reduced Chemistry, 114: 436
Ignition of Heterogeneous Mixturss in Gravitational Fields, 113: 388
Importance of Non-Fourier Heat Conduction in Solid- Phase Reactions, 112: 329
Incorporation of Parametric Uncertainty into Complex Kinetic Mechanisms: Application to Hydrogen Oxidation in Supercritical Water, 112: 132
Inhibition of Premixed Hydrogen–Air Flames by 2-H Heptafluoropropane, 113: 554
An Investigation of the Accuracy of Manifold Methods and Splitting Schemes in the Computational Implementation of Combustion Chemistry, 112: 16
Laminar Burning Velocities of Trifluoromethane Methane Mixtures: Experiment and Numerical Simulation, 114: 457
Laser-Induced Fluorescence, Mass Spectrometric, and Modeling Studies of Neat and NH_3-Doped H_2/N_2O/Ar Flames, 115: 313
Mapping of Soot Particles in a Weakly Sooting Diffusion Flame by Aerosol Techniques, 115: 275
A Mixing Model for Turbulent Reactive Flows based on Euclidean Minimum Spanning Trees, 115: 52
Modelling the Temporal Evolution of a Reduced Combustion Chemical System With an Artificial Neural Network, 113: 38
A Modified CCW Theory for Detonation Waves, 113: 1
Net Rate Analysis Method for Assessment and Improvement of Flame Models, 112: 371
The Normal Detonation Shock Velocity-Curvature Relationship for Materials with Nonideal Equation of State and Multiple Turning Points, 113: 224

Numerical Modeling of NO Formation in Laminar Bunsen Flames—A Flamelet Approach, 114: 420
Numerical Simulation of Premixed Combustion Processes in Closed Tubes, 114: 397
A Numerical Study of a Two-Dimensional H_2-O_2-Ar Detonation Using a Detailed Chemical Reaction Model, 113: 147
Numerical Study of Unsteady Turbulent Premixed Combustion: Application to Flashback Simulation, 113: 53
On the Adequacy of Certain Experimental Variables as Measurements of Flame Burning Rate, 113: 312
On the Effects of the Inlet Boundary Condition on the Mixing and Burning in Reacting Shear Flows, 112: 404
Optimization of Rate Coefficients for Simplified Reaction Mechanisms with Genetic Algorithms, 113: 119
Pdf Modeling of Finite-rate Chemistry Effects in Turbulent Nonpremixed Jet Flames, 115: 210
Peculiarities of the Slow Combustion of a Hydrocarbon in a "Wall-less" Reactor with Laser Heating, 112: 261
Premixed-Flame Propagation in Turbulent Taylor-Couette Flow, 115: 395
A Quasi-Steady Shrinking Core Analysis of Wood Combustion, 114: 1
Response to Comment by T. J. Poinsot on "Flame Stretch Interactions of Laminar Premixed Hydrogen/Air Flames at Normal Temperature and Pressure," 113: 282
Role of the Pore Structure in the Fragmentation of Highly Porous Char Particles, 113: 532
Scalar Transport Characteristics of the Linear-Eddy Model, 112: 253
Soot Formation Characteristics of Laminar Partially Premixed Flames, 115: 437
Structure and Propagation of Methanol–Air Triple Flames, 114: 231
Study of Autoignition of Natural Gas in Diesel Environments Using Computational Fluid Dynamics with Detailed Chemical Kinetics, 113: 289
A Study of Coupled Turbulent Mixing, Soot Chemistry, and Radiation Effects Using the Linear Eddy Model, 113: 454
A Thin Front Model Applied to Flame Propagation in Tubes, 113: 470
Topics in Environmental and Safety Aspects of Combustion Technology (Book Review), 112: 283
Transient Heating, Gasification, and Oxidation of an Energetic Liquid Fuel, 114: 349
Transition from Deflagration to Detonation in an End Multiphase Slug, 114: 13
Treating Chemistry in Combustion with Detailed Mechanisms—*In Situ* Adaptive Tabulation in Principal Directions—Premixed Combustion, 112: 85
Two-Parameter Continuationn Algorithms for Sensitivity Analysis, Parametric Dependence, Reduced Mechanisms, and Stability Criteria of Ignition and Extinction, 112: 45

5. COMBUSTION SYSTEMS: MODELING AND SCALING
Aromatic and Polycyclic Aromatic Hydrocarbon Formation in a Laminar Premixed *n*-Butane Flame, 114: 192
Chemical Limits to Flame Inhibition, 115: 116
Comments on "Flame Stretch Interactions of Laminar Premixed Hydrogen Air Flames at Normal Temperature and Pressure" by K. T. Aung, M. J. Hassan, and G. M. Faeth, 113: 279
A Comprehensive Modeling Study of *n*-Heptane Oxidation, 114: 149
Computer-Aided Derivation of Gas-Phase Oxidation Mechanisms: Application to the Modeling of the Oxidation of *n*-Butane, 114: 81
A Consistent Flamelet Formulation for Non-Premixed Combustion Considering Differential Diffusion Effects, 114: 26
Development of a Coherent Flamelet Model for a Spark-Ignited Turbulent Premixed Flame in a Closed Vessel, 114: 336
Dynamic Modeling of Soot Particle Coagulation and Aggregation: Implementation with the Method of Moments and Application to High-Pressure Laminar Premixed Flames, 114: 484
Experiments and Numerical Simulation on the Laminar Flame Speeds of Dichloromethane and Trichloromethane, 114: 285
The Evolution of Soot Precursor Particles in a Diffusion Flame, 115: 285
Flame Speeds in Combustible Vortex Rings, 113: 542

Flame Spread Over a Flat, Combustible, Thermally Thick Solid in an Opposed Oxidizer Shear Flow, 112: 623
A High-Speed Photographic Study of the Impact Initiation of Hexanitro-Hexaaza-Isowurtzitane and Nitrotriazolone, 112: 62
Incorporation of Parametric Uncertainty into Complex Kinetic Mechanisms: Application to Hydrogen Oxidation in Supercritical Water, 112: 132
An Induction Parameter Model for Shock-Induced Hydrogen Combustion Simulations, 113: 106
Influence of HCl on the Homogeneous Reactions of CO and NO in Postcombustion Conditions—A Kinetic Modeling Study, 113: 579
Isothermal Chain-Branching, Reaction Exothermicity, and Transport Interactions in the Stability of Methane/Air Mixtures, 114: 214
A Kinetic Model of Carbon Burnout in Pulverized Coal Combustion, 113: 181
Measured and Predicted Properties of Laminar Premixed Methane/Air Flames at Various Pressures, 115: 104
Mild Oxidation Regimes and Multiple Criticality in Nonpremixed Hydrogen–Air Counterflow, 112: 457
Net Rate Analysis Method for Assessment and Improvement of Flame Models, 112: 371
On Droplet Enhancement of the Burning Velocity of Laminar Premixed Spray Flames, 113: 271
Premixed Flames in Stagnating Turbulence Part II. The Mean Velocities and Pressure and the Damköhler Number, 112: 635
A Quasi-Steady Shrinking Core Analysis of Wood Combustion, 114: 1
A Rate-Controlled Constrained-Equilibrium Thermochemistry Algorithm for Complex Reacting Systems, 115: 66
The Rates of Production of CO and CO_2 from the Combustion of Pulverized Coal Particles in a Shock Tube, 112: 121
Revisited Flamelet Model for Nonpremixed Combustion in Supersonic Turbulent Flows, 114: 577
Steady Deflagration of HMX With Simple Kinetics: A Gas Phase Chain Reaction Model, 114: 556
Stochastic Modeling of CO and NO in Premixed Methane Combustions, 113: 135
The Strong-Jet/Weak Jet Problem and Aerodynamic Modeling of the CGRI Burner, 114: 381
A Study of Coupled Turbulent Mixing, Soot Chemistry, and Radiation Effects Using the Linear Eddy Model, 113: 454
Subgrid-Scale Modeling for Turbulent Reacting Flows, 112: 593
A Turbulent Jet Chemical Reaction Model: NO_x Production in Jet Flames, 114: 319

6. COMBUSTION SYSTEMS: NEW
Heat Transfer Consequences of Condensation during Premixed Flame Quenching, 112: 266

7. DETONATIONS: CONDENSED PHASE AND HETEROGENEOUS
The Normal Detonation Shock Velocity-Curvature Relationship for Materials with Nonideal Equation of State and Multiple Turning Points, 113: 224
Transition from Deflagration to Detonation in an End Multiphase Slug, 114: 13

8. DETONATIONS: GAS PHASE
The Effect of Mixing Irregularities on Mixed-Region Critical Length for Deflagration-to-Detonation Transition, 115: 38
Flame Acceleration and Transition to Detonation in Benzene–Air Mixtures, 115: 424
An Induction Parameter Model for Shock-Induced Hydrogen Combustion Simulations, 113: 106
The Normal Detonation Shock Velocity-Curvature Relationship for Materials with Nonideal Equation of State and Multiple Turning Points, 113: 224
Numerical Simulation of Premixed Combustion Processes in Closed Tubes, 114: 397
A Numerical Study of a Two-Dimensional H_2-O_2-Ar Detonation Using a Detailed Chemical Reaction Model, 113: 147

9. DIAGNOSTICS: LASER
Calibration and Correction of Laser-Induced Incandescence for Soot Volume Fraction Measurements, 112: 485

Collisional Quenching of CH(A), OH(A), and NO(A) in Low Pressure Hydrocarbon Flames, 114: 502
An Examination of the Applicability of Computed Tomography for the Measurement of Component Concentrations in Fire-Generated Plumes, 113: 358
An Experimental and Numerical Study of a Laminar Triple Flame, 115: 335
Laser-Induced Fluorescence, Mass Spectrometric, and Modeling Studies of Neat and NH_3-Doped H_2/N_2O/Ar Flames, 115: 313
Laser-Induced Fluorescence of CF_2 from a CH_4 Flame and an H_2 Flame with Addition of HCFC-22 and HFC-134a, 113: 236
Laser-Saturated Fluorescence Measurements of Nitric Oxide in Laminar Counterflow Diffusion Flames, 113: 473
MBMS Analysis of a Fuel-Lean Ethylene Flame, 115: 14
Measurements of Gas Concentrations in a Fluidized Bed Combustor Using Laser-Induced Photoacoustic Spectroscopy and Zirconia-Cell Probes, 113: 477
Mixture of Triethylamine (TEA) and Benzene as a New Seeding Material for the Quantitative Two-Dimensional Laser-Induced Exciplex Fluorescence Imaging of Vapor and Liquid Fuel Inside SI Engines, 112: 199
Soot Precursor Carbonization: Visualization Using LIF and LII and Comparison Using Bright and Dark Field TEM, 112: 607
Spatial Averaging Effects in CARS Thermometry of a Nonpremixed Flame, 115: 39
Time Resolved Velocity and Turbulence Measurements in Turbulent Gaseous Explosions, 114: 469

10. DIAGNOSTICS: OPTICAL AND PHOTOGRAPHIC
Appearance and Stability of a Laminar Conical Premixed Flame Subjected to an Acoustic Perturbation, 114: 303
Determination of the Soot Volume Fraction in an Ethylene Diffusion Flame by Multiwavelength Analysis of Soot Radiation, 115: 253
An Examination of the Applicability of Computed Tomography for the Measurement of Component Concentrations in Fire-Generated Plumes, 113: 358
Temperature Measurements of Optically Non-Gray Particles in High-Temperature Dusty Media, 115: 364

11. DIAGNOSTICS: OTHER
Mapping of Soot Particles in a Weakly Sooting Diffusion Flame by Aerosol Techniques, 115: 276
Measurements of the Concentrations of Free Hydrogen Atoms in Flames from Observations of Ions: Correlation of Burning Velocities with Concentrations of Free Hydrogen Atoms, 115: 241

12. EXPERIMENTAL TECHNIQUES OR RESULTS: BURNERS
Aromatic and Polycyclic Aromatic Hydrocarbon Formation in a Laminar Premixed *n*-Butane Flame, 114: 192
Burning Velocities of Flamelets in a Turbulent Premixed Flame, 113: 487
Collisional Quenching of CH(A), OH(A), and NO(A) in Low Pressure Hydrocarbon Flames, 114: 502
Combustion Rate of Burning Graphite in a Stagnation Flow of Water Vapor, 113: 258
Determination of the Soot Volume Fraction in an Ethylene Diffusion Flame by Multiwavelength Analysis of Soot Radiation, 115: 253
Evidence for a New Way of Producing NO via NNH in Fuel-Rich Flames at Atmospheric Pressure, 114: 274
An Experimental and Numerical Study of a Laminar Triple Flame, 115: 335
An Experimental Determination of the Laminar Burning Velocities and Extinction Stretch Rates of Benzene/Air Flames, 113: 242
Experiments and Numerical Simulation on the Laminar Flame Speeds of Dichloromethane and Trichloromethane, 114: 285
Flame Front Configuration of Turbulent Premixed Flames, 112: 293
Flame Lift-off and Stabilization Mechanisms of Nonpremixed Jet Flames on a Bluff-Body Burner, 115: 51

Flame Speeds in Combustible Vortex Rings, 113: 542
A High-Speed Photographic Study of the Impact Initiation of Hexanitro-Hexaaza-Isowurtzitane and Nitrotriazolone, 112: 62
Instantaneous and Mean Compositional Structure of Bluff-Body Stalizied Nonpremixed Flames, 114: 119
Location of the Schlieren Image in Premixed Flames: Axially Symmetrical Refractive Index Fields, 113: 303
Mapping of Soot Particles in a Weakly Sooting Diffusion Flame by Aerosol Techniques, 115: 276
Mass-Spectrometric Sampling of Ions from Flames at Atmospheric Pressure: The Effects of Applied Electric Fields and the Variation of Electric Potential in a Flame, 114: 294
MBMS Analysis of a Fuel-Lean Ethylene Flame, 115: 14
Measured and Predicted Properties of Laminar Premixed Methane/Air Flames at Various Pressures, 115: 104
Measured Flame structure and Kinetics in a Fuel-Rich Ethylene Flame, 113: 333
Measurements of the Concentrations of Free Hydrogen Atoms in Flames from Observations of Ions: Correlation of Burning Velocities with Concentrations of Free Hydrogen Atoms, 115: 241
Mild Oxidation Regimes and Multiple Criticality in Nonpremixed Hydrogen–Air Counterflow, 112: 457
Nitric Oxide Emissions from Laminar Diffusion Flames: Effects of Air-side versus Fuel-side Diluent Addition, 113: 66
On the Adequacy of Certain Experimental Variables as Measurements of Flame Burning Rate, 113: 312
Polycyclic Aromatic Hydrocarbon Formation in Opposed Flow Diffusion Flames of Ethane, 114: 259
Premixed Flame Stabilization in an Axisymmetric Curved-Wall Jet, 113: 348
A Ring Stabilizer for Lean Premixed Turbulent Flames, 114: 594
Soot Formation in Counterflow Ethylene Diffusion Flames from 1 to 2.5 Atmospheres, 113: 264
Soot Formation in Laminar Premixed Methane/Oxygen Flames at Atmospheric Pressure, 115: 195
Soot Formation in Methane/Air Nonpremixed Flames Doped with Small Quantities of C3 Hydrocarbons, 112: 545
Spatial Averaging Effects in CARS Thermometry of a Nonpremixed Flame, 115: 39
Species and Soot Concentration Measurements in a Methane/Air Nonpremixed Flame Doped With C4 Hydrocarbons, 115: 81
Structure of Laminar Permanently Blue, Opposed-Jet Ethylene-Fueled Diffusion Flames, 115: 26
Synergistic Effect of Ethylene–Propane Mixture on Soot Formation in Laminar Diffusion Flames, 114: 370

13. EXPERIMENTAL TECHNIQUES OR RESULTS: PLUG FLOW REACTORS
Benzene Formation from the Flow Reactor Oxidation of Methyl *t-Butyl* Ether, 115: 262
Gas-Phase Pyrolysis of Diisopropyl Methylphosphonate, 115: 230
Hydrogen/Nitrous Oxide Kinetics—Implications of the $_NH_Y$ Species, 112: 302
The Influence of Nitric Oxide on the Oxidation of Methanol and Ethanol, 115: 126

14. EXPERIMENTAL TECHNIQUES OR RESULTS: QUASI-STATIC VESSELS
Chemiluminescence from the Reactions of Ba[6s5d(^3D_J)] with CF_3Br and CF_2BR_2 Including Branching Ratios into the Electronic States BaBr($A^2\Pi_{1/2}$, $A^2\Pi_{3/2}$, $B^2\Sigma^+$) following the Pulsed Dye-Laser Excitation of Atomic Barium, 113: 566
CO_2 Laser-Induced Combustion of Ammonium Dinitramide (ADN), 114: 515
Correlations for the Laminar-Burning Velocity of Methane/Diluent/Air Mixtures Obtained in Free-Fall Experiments, 114: 546
Effects of Pressure and Nitrogen Dilution on Flame/Stretch Interactions of Laminar Premixed $H_2/O_2/N_2$ Flames, 112: 1

15. EXPERIMENTAL TECHNIQUES OR RESULTS: SHOCK TUBES
CH-Radical Concentration Measurements in Fuel-Rich CH_4/O_2/Ar and CH_4/O_2/NO/Ar Mixtures Behind Shock Waves, 113: 624

Flame Acceleration and Transition to Detonation in Benzene–Air Mixtures, 115: 424
Pyrometric Determination of Temperature in Rich Flames and Wavelength Dependence of Their Emissivity, 114: 359
Rapid Compression Machines: Heat Transfer and Suppression of Corner Vortex, 114: 531
The Rates of Production of CO and CO_2 from the Combustion of Pulverized Coal Particles in a Shock Tube, 112: 121
Soot and PAH Production from Spray Combustion of Different Hydrocarbons Behind Reflected Shock Waves, 112: 359

16. EXPERIMENTAL TECHNIQUES OR RESULTS: WELL STIRRED REACTORS
A Comparative Study of the Kinetics of Benzene Formation from Unsaturated C_2 to C_4 Hydrocarbons, 113: 620
Controlling Steps in the Low-Temperature Oxidation of n-Heptane and iso-Octane, 112: 617
Heat Transfer Consequences of Condensation during Premixed Flame Quenching, 112: 266
Isothermal Chain-Branching, Reaction Exothermicity, and Transport Interactions in the Stability of Methane/Air Mixtures, 114: 214

17. FIRE OR EXPLOSION PHENOMENA, COMBUSTION SAFETY
Accounting for Reactant Consumption in the Thermal Explosion Problem III: Criticality Conditions for the Arrhenius Problem, 113: 212
Air Dilution, Under Calm, of Spreading Dense Vapor from an Instantaneous Spill of Volatile Liquid, 114: 178
Effect of Inerts on Layer Ignition Temperatures of Coal Dust, 114: 41
An Examination of the Applicability of Computed Tomography for the Measurement of Component Concentrations in Fire-Generated Plumes, 113: 358
Flame Acceleration and Transition to Detonation in Benzene–Air Mixtures, 115: 424
Inhibition of Premixed Methane–Air Flames by Fluoroethanes and Fluoropropanes, 113: 164
Initiation of Flame Spreading on Shallow Subflash Fuel Layers, 114: 280
Time Resolved Velocity and Turbulence Measurements in Turbulent Gaseous Explosions, 114: 469

18. FLAME IGNITION OR STABILIZATION
Comments on "Flame Stretch Interactions of Laminar Premixed Hydrogen Air Flames at Normal Temperature and Pressure" by K. T. Aung, M. J. Hassan, and G. M. Faeth, 113: 279
Effect of Inerts on Layer Ignition Temperatures of Coal Dust, 114: 41
Effects of Oxygen Concentration on Combustion of Aluminum in Oxygen/Nitrogen Mixture Streams, 115: 327
Ignition and Combustion of Fuel Pockets Moving in an Oxidizing Atmosphere, 115: 383
Ignition in Nonpremixed Counterflowing Hydrogen versus Heated Air: Computational Study with Skeletal and Reduced Chemistry, 114: 436
Ignition of Coal Particles at High Pressure in a Thermogravimetric Analyzer, 115: 268
Ignition of Plane Laminar Premixed Jets in a Hot Inert Environment, 112: 285
Initiation of Flame Spreading on Shallow Subflash Fuel Layers, 114: 280
Ketohydroperoxides and Ignition Delay in Internal Combustion Engines, 112: 278
Laser Spark Ignition and Combustion Characteristics of Methane–Air Mixtures, 112: 492
Mechanism of Flame Stabilization in Turbulent, Lifted- Jet Flames, 112: 559
Numerical Study of Unsteady Turbulent Premixed Combustion: Application to Flashback Simulation, 113: 53
Role of the Pore Structure in the Fragmentation of Highly Porous Char Particles, 113: 532
Study of Autoignition of Natural Gas in Diesel Environments Using Computational Fluid Dynamics with Detailed Chemical Kinetics, 113: 289
Suppression of Ignition over a Heated Metal Surface, 112: 161

Suppression of Reaction During Rapid Compression and Its Effect on Ignition Delay, 112: 438
Theory of Radical-Induced Ignition of Counterflowing Hydrogen versus Oxygen at High Temperatures, 112: 242
Two-Parameter Continuation Algorithms for Sensitivity Analysis, Parametric Dependence, Reduced Mechanisms, and Stability Criteria of Ignition and Extinction, 112: 45

19. FLAME QUENCHING OR EXTINCTION
Counterflow Spray Combustion Modeling with Detailed Transport and Detailed Chemistry, 113: 92
Dynamics of Water Droplets in a Counterflow Field and their Effect on Flame Extinction, 115: 158
Effects of Thermal Boundary Conditions on Flame Shape and Quenching in Ducts, 112: 73
Flame Bifurcations and Flammable Regions of Radiative Counterflow Premixed Flames with General Lewis Numbers, 113: 603
Gas-Phase Radiative Effects on the Burning and Extinction of a Solid Fuel, 112: 231
Nonpremixed Edge Flames in Spatially Varying Straining Flows, 112: 171
Structure and Extinction of Methane–Air Flamelet with Radiation and Detailed Chemical Kinetic Mechanism, 112: 445
Two-Parameter Continuation Algorithms for Sensitivity Analysis, Parametric Dependence, Reduced Mechanisms, and Stability Criteria of Ignition and Extinction, 112: 45
Velocity and Thermal Structure and Strain-Induced Extinction of 14 to 100% Hydrogen–Air Counterflow Diffusion Flames, 112: 575

20. FLAMES: DIFFUSION
A Comparison of Scalar PDF Turbulent Combustion Models, 113: 442
A Consistent Flamelet Formulation for Non-Premixed Combustion Considering Differential Diffusion Effects, 114: 26
Convective Burning of Gaseous Fuel Pockets and Supercritical Droplets, 115: 145
Counterflow Spray Combustion Modeling with Detailed Transport and Detailed Chemistry, 113: 92
Dynamics and Structure of Interacting Nonpremixed Flames, 115: 180
Edge-Flames in Homogeneous Mixtures, 114: 267
Effect of Radiative Heat Loss on Diffusion Flames in Quiescent Microgravity Atmosphere, 115: 372
Estimates of Liquid Species Diffusivities from Experiments on Reduced-Gravity Combustion of Heptane–Hexadecane Droplets, 113: 507
An Experimental and Numerical Study of a Laminar Triple Flame, 115: 335
Extinction of Low-Stretched Diffusion Flame in Microgravity, 112: 181
Finite Rate Chemistry and NO Molefraction in Non-Premixed Turbulent Flames, 113: 198
Flame Lift-off and Stabilization Mechanisms of Nonpremixed Jet Flames on a Bluff-Body Burner, 115: 51
Flame Spread Over a Flat, Combustible, Thermally Thick Solid in an Opposed Oxidizer Shear Flow, 112: 623
Ignition and Combustion of Fuel Pockets Moving in an Oxidizing Atmosphere, 115: 383
Instantaneous and Mean Compositional Structure of Bluff-Body Stalizied Nonpremixed Flames, 114: 119
Laboratory Generation of Free Chlorine from HCl under Stratospheric Afterburning Conditions, 112: 210
Laser-Induced Fluorescence of CF_2 from a CH_4 Flame and an H_2 Flame with Addition of HCFC-22 and HFC-134a, 113: 236
Laser-Saturated Fluorescence Measurements of Nitric Oxide in Laminar Counterflow Diffusion Flames, 113: 473
Mapping of Soot Particles in a Weakly Sooting Diffusion Flame by Aerosol Techniques, 115: 276
MBMS Analysis of a Fuel-Lean Ethylene Flame, 115: 14
Mechanism of Flame Stabilization in Turbulent, Lifted-Jet Flames, 112: 559
Nitric Oxide Emissions from Laminar Diffusion Flames: Effects of Air-side versus Fuel-side Diluent Addition, 113: 66

Nonpremixed Edge Flames in Spatially Varying Straining Flows, 112: 171
Numerical Modeling of NO Formation in Laminar Bunsen Flames—A Flamelet Approach, 114: 420
On NO_x Emissions from Turbulent Propane Diffusion Flames, 112: 221
A Parametric Study of NO_2 Emission from Turbulent H_2 and CH_4 Jet Diffusion Flames, 112: 188
Pdf Modeling of Finite-rate Chemistry Effects in Turbulent Nonpremixed Jet Flames, 115: 210
Polycyclic Aromatic Hydrocarbon Formation in Opposed Flow Diffusion Flames of Ethane, 114: 259
Rate–Ratio Asymptotic Analysis of Inhibition of Nonpremixed Methane–Air Flames by CF_3Br, 112: 418
Revisited Flamelet Model for Nonpremixed Combustion in Supersonic Turbulent Flows, 114: 577
Soot Formation in Counterflow Ethylene Diffusion Flames from 1 to 2.5 Atmospheres, 113: 264
Soot Microstructure in Steady and Flickering Laminar Methane/Air Diffusion Flames, 112: 473
Spatial Averaging Effects in CARS Thermometry of a Nonpremixed Flame, 115: 39
Species and Soot Concentration Measurements in a Methane/Air Nonpremixed Flame Doped With C4 Hydrocarbons, 115: 81
Structure and Extinction of Methane–Air Flamelet with Radiation and Detailed Chemical Kinetic Mechanism, 112: 445
Structure of Laminar Permanently Blue, Opposed-Jet Ethylene-Fueled Diffusion Flames, 115: 26
A Study of Coupled Turbulent Mixing, Soot Chemistry, and Radiation Effects Using the Linear Eddy Model, 113: 454
Synergistic Effect of Ethylene–Propane Mixture on Soot Formation in Laminar Diffusion Flames, 114: 370
Theory of Radical-Induced Ignition of Counterflowing Hydrogen versus Oxygen at High Temperatures, 112: 242
A Turbulent Jet Chemical Reaction Model: NO_x Production in Jet Flames, 114: 319
Velocity and Thermal Structure and Strain-Induced Extinction of 14 to 100% Hydrogen–Air Counterflow Diffusion Flames, 112: 575

21. FLAMES: NONSTEADY
Comments on "Flame Stretch Interactions of Laminar Premixed Hydrogen Air Flames at Normal Temperature and Pressure" by K. T. Aung, M. J. Hassan, and G. M. Faeth, 113: 279
Dynamics and Structure of Interacting Nonpremixed Flames, 115: 180
Flame Acceleration and Transition to Detonation in Benzene–Air Mixtures, 115: 424
Modelling the Temporal Evolution of a Reduced Combustion Chemical System With an Artificial Neural Network, 113: 38
Soot Microstructure in Steady and Flickering Laminar Methane/Air Diffusion Flames, 112: 473

22. FLAMES: PREMIXED
Analysis of the Influence of Cold Front Quenching on the Turbulent Burning Velocity Associated with an Eddy Break-Up Model, 113: 492
Appearance and Stability of a Laminar Conical Premixed Flame Subjected to an Acoustic Perturbation, 114: 303
Approximation for Burning Velocities and Markstein Numbers for Lean Hydrocarbon and Methanol Flames, Combustion and Flame 108: 349–356 (1997) (Erratum), 112: 284
Aromatic and Polycyclic Aromatic Hydrocarbon Formation in a Laminar Premixed *n*-Butane Flame, 114: 192
Asymptotic Analysis of the Structure of Moderately Rich Methane–Air Flames, 113: 589
Burning Velocities of Flamelets in a Turbulent Premixed Flame, 113: 487
Collisional Quenching of CH(A), OH(A), and NO(A) in Low Pressure Hydrocarbon Flames, 114: 502
Correlations for the Laminar-Burning Velocity of Methane/Diluent/Air Mixtures Obtained in Free-Fall Experiments, 114: 546

Development of a Coherent Flamelet Model for a Spark-Ignited Turbulent Premixed Flame in a Closed Vessel, 114: 336

Numerical Study of Unsteady Turbulent Premixed Combustion: Application to Flashback Simulation, 113: 53
Rapid Compression Machines: Heat Transfer and Suppression of Corner Vortex, 114: 531
Role of the Pore Structure in the Fragmentation of Highly Porous Char Particles, 113: 532

27. FLUID DYNAMICS: TURBULENT
On the Effects of the Inlet Boundary Condition on the Mixing and Burning in Reacting Shear Flows, 112: 404
Peculiarities of the Slow Combustion of a Hydrocarbon in a "Wall-less" Reactor with Laser Heating, 112: 261
Scalar Transport Characteristics of the Linear-Eddy Model, 112: 253
A Stochastic Model of Particle Dispersion in a Turbulent Gaseous Environment, 113: 424
The Strong-Jet/Weak Jet Problem and Aerodynamic Modeling of the CGRI Burner, 114: 381
Vorticity Generation and Attenuation as Vortices Convect Through a Premixed Flame, 112: 342

28. FUELS, OXIDIZERS AND ADDITIVES, NONCONVENTIONAL
Effect of Fluorine on the Gasification Rate of Liquid Boron Oxide Droplets, 112: 387
Effects of Oxygen Concentration on Combustion of Aluminum in Oxygen/Nitrogen Mixture Streams, 115: 327
An Experimental Determination of the Laminar Burning Velocities and Extinction Stretch Rates of Benzene/Air Flames, 113: 242
Laser-Induced Fluorescence of CF_2 from a CH_4 Flame and an H_2 Flame with Addition of HCFC-22 and HFC-134a, 113: 236
Study of Ammonia Removal from Coal-Gasified Fuel, 114: 246

29. HETEROGENEOUS COMBUSTION: AEROSOLS, SPRAYS AND AIRBORNE DUSTS
Counterflow Spray Combustion Modeling with Detailed Transport and Detailed Chemistry, 113: 92
Mixture of Triethylamine (TEA) and Benzene as a New Seeding Material for the Quantitative Two-Dimensional Laser-Induced Exciplex Fluorescence Imaging of Vapor and Liquid Fuel Inside SI Engines, 112: 199
On Droplet Enhancement of the Burning Velocity of Laminar Premixed Spray Flames, 113: 271
Pyrometric Determination of Temperature in Rich Flames and Wavelength Dependence of Their Emissivity, 114: 359
Soot and PAH Production from Spray Combustion of Different Hydrocarbons Behind Reflected Shock Waves, 112: 359
Soot Morphology in a Liquid-Fueled, Swirl-Stabilized Combustor, 112: 312
A Stochastic Model of Particle Dispersion in a Turbulent Gaseous Environment, 113: 424
Transition from Deflagration to Detonation in an End Multiphase Slug, 114: 13

30. HETEROGENEOUS COMBUSTION: CATALYTIC COMBUSTION

31. HETEROGENEOUS COMBUSTION: COAL, CHAR OR CARBON
Combustion Rate of Burning Graphite in a Stagnation Flow of Water Vapor, 113: 258
The Contribution of Char Burnout from Gasification by H_2O and CO_2 During Pulverized-Coal Flame Combustion, 113: 274
Effect of Inerts on Layer Ignition Temperatures of Coal Dust, 114: 41
H_2O_2-Assisted Regeneration of Diesel Particulate Traps at Typical Exhaust Gas Temperatures, 115: 28
Ignition and Combustion of a Packed Bed in a Stagnation Point Flow Part II: Heterogeneous and Homogenous Reactions, 113: 373
Ignition of Coal Particles at High Pressure in a Thermogravimetric Analyzer, 115: 268

Influence of Pressure on the Heterogeneous Formation and Destruction of Nitrogen Oxides during Char Combustion, 112: 33
A Kinetic Model of Carbon Burnout in Pulverized Coal Combustion, 113: 181
The Rates of Production of CO and CO_2 from the Combustion of Pulverized Coal Particles in a Shock Tube, 112: 121
Role of the Pore Structure in the Fragmentation of Highly Porous Char Particles, 113: 532
Study of Ammonia Removal from Coal-Gasified Fuel, 114: 246
The Thermal Conductivity and Porous Structure of Char Particles, 113: 519

32. HETEROGENEOUS COMBUSTION: SINGLE DROPLET OR PARTICLE
Convective Burning of Gaseous Fuel Pockets and Supercritical Droplets, 115: 145
Dynamics of Water Droplets in a Counterflow Field and their Effect on Flame Extinction, 115: 158
Effect of Fluorine on the Combustion of "Clean" Surface Boron Particles, 112: 507
Effect of Fluorine on the Gasification Rate of Liquid Boron Oxide Droplets, 112: 387
Effects of Pressure and Oxygen Concentration on Ignition and Combustion of Boron in Oxygen/Nitrogen Mixture Streams, 113: 380
Effects of the Lewis Number of Water Vapor on the Combustion and Extinction of Methanol Drops, 112: 113
Estimates of Liquid Species Diffusivities from Experiments on Reduced-Gravity Combustion of Heptane–Hexadecane Droplets, 113: 507
Ignition of Coal Particles at High Pressure in a Thermogravimetric Analyzer, 115: 268
Phases of Titanium Combustion in Air, 112: 522
A Quasi-Steady Shrinking Core Analysis of Wood Combustion, 114: 1
Role of the Pore Structure in the Fragmentation of Highly Porous Char Particles, 113: 532
A Stochastic Model of Particle Dispersion in a Turbulent Gaseous Environment, 113: 424
The Thermal Conductivity and Porous Structure of Char Particles, 113: 519
Transient Heating, Gasification, and Oxidation of an Energetic Liquid Fuel, 114: 349

33. HETEROGENEOUS COMBUSTION: SLAB, POOL, FLUIDIZED BED, ETC.
Direct Numerical Simulation for Turbulent Reacting Flows (Book Review), 113: 277
Flame Spread Over a Flat, Combustible, Thermally Thick Solid in an Opposed Oxidizer Shear Flow, 112: 623
Gas-Phase Radiative Effects on the Burning and Extinction of a Solid Fuel, 112: 231
H_2O_2-Assisted Regeneration of Diesel Particulate Traps at Typical Exhaust Gas Temperatures, 115: 28
Hydrodynamic Instability in an Extended Landau/Levich Model of Liquid-Propellant Combustion at Normal and Reduced Gravity, 113: 406
Ignition of Heterogeneous Mixtures in Gravitational Fields, 113: 388
Importance of Non-Fourier Heat Conduction in Solid-Phase Reactions, 112: 329
Initiation of Flame Spreading on Shallow Subflash Fuel Layers, 114: 280
Measurements of Gas Concentrations in a Fluidized Bed Combustor Using Laser-Induced Photoacoustic Spectroscopy and Zirconia-Cell Probes, 113: 477
The Solubility of Oxygen in Liquid Iron Dioxide During the Combustion of Iron Rods in High-Pressure Oxygen, 113: 27

34. INHIBITION
Chemical Limits to Flame Inhibition, 115: 116
Inhibition Effectiveness of Halogenated Compounds, 112: 147
Inhibition of Premixed Methane–Air Flames by Fluoroethanes and Fluoropropanes, 113: 164
Rate–Ratio Asymptotic Analysis of Inhibition of Nonpremixed Methane–Air Flames by CF_3Br, 112: 418
Suppression of Ignition over a Heated Metal Surface, 112: 161
Suppression of Reaction During Rapid Compression and Its Effect on Ignition Delay, 112: 438

35. IONIZATION AND/OR ELECTRICAL EFFECTS
Mass-Spectrometric Sampling of Ions from Flames at Atmospheric Pressure: The Effects of Applied Electric Fields and the Variation of Electric Potential in a Flame, 114: 294
Measurements of the Concentrations of Free Hydrogen Atoms in Flames from Observations of Ions: Correlation of Burning Velocities with Concentrations of Free Hydrogen Atoms, 115: 241

36. KINETICS AND/OR REACTION MECHANISMS: DETAILED
Approximation for Burning Velocities and Markstein Numbers for Lean Hydrocarbon and Methanol Flames, Combustion and Flame 108: 349–356 (1997) (Erratum), 112: 284
Aromatic and Polycyclic Aromatic Hydrocarbon Formation in a Laminar Premixed *n*-Butane Flame, 114: 192
Asymptotic Analysis of the Structure of Moderately Rich Methane–Air Flames, 113: 589
Chemiluminescence from the Reactions of Ba[6s5d(^3D_J)] with CF_3Br and CF_2BR_2 Including Branching Ratios into the Electronic States BaBr($A^2\Pi_{1/2}$, $A^2\Pi_{3/2}$, $B^2\Sigma^+$) following the Pulsed Dye-Laser Excitation of Atomic Barium, 113: 566
CH-Radical Concentration Measurements in Fuel-Rich CH_4/O_2/Ar and CH_4/O_2/NO/Ar Mixtures Behind Shock Waves, 113: 624
A Comparative Study of the Kinetics of Benzene Formation from Unsaturated C_2 to C_4 Hydrocarbons, 113: 620
A Comprehensive Modeling Study of *n*-Heptane Oxidation, 114: 149
Computer-Aided Derivation of Gas-Phase Oxidation Mechanisms: Application to the Modeling of the Oxidation of *n*-Butane, 114: 81
Controlling Steps in the Low-Temperature Oxidation of n-Heptane and iso-Octane, 112: 617
Effect of Fluorine on the Combustion of "Clean" Surface Boron Particles, 112: 507
Effect of Fluorine on the Gasification Rate of Liquid Boron Oxide Droplets, 112: 387
Effects of Pressure and Nitrogen Dilution on Flame/Stretch Interactions of Laminar Premixed $H_2/O_2/N_2$ Flames, 112: 1
An Experimental and Numerical Study of a Laminar Triple Flame, 115: 335
Experiments and Numerical Simulation on the Laminar Flame Speeds of Dichloromethane and Trichloromethane, 114: 285
Heat Transfer Consequences of Condensation during Premixed Flame Quenching, 112: 266
A High-Speed Photographic Study of the Impact Initiation of Hexanitro-Hexaaza-Isowurtzitane and Nitrotriazolone, 112: 62

Ignition and Combustion of a Packed Bed in a Stagnation Point Flow Part II: Heterogeneous and Homogenous Reactions, 113: 373
Ignition in Nonpremixed Counterflowing Hydrogen versus Heated Air: Computational Study with Skeletal and Reduced Chemistry, 114: 436
Influence of HCl on the Homogeneous Reactions of CO and NO in Postcombustion Conditions—A Kinetic Modeling Study, 113: 579
The Influence of Nitric Oxide on the Oxidation of Methanol and Ethanol, 115: 126
Inhibition Effectiveness of Halogenated Compounds, 112: 147
Inhibition of Premixed Methane–Air Flames by Fluoroethanes and Fluoropropanes, 113: 164
An Investigation of the Accuracy of Manifold Methods and Splitting Schemes in the Computational Implementation of Combustion Chemistry, 112: 16
Isothermal Chain-Branching, Reaction Exothermicity, and Transport Interactions in the Stability of Methane/Air Mixtures, 114: 214
Kinetic Modeling of Hydrocarbon/Nitric Oxide Interactions in a Flow Reactor, 115: 1
Measured and Predicted Properties of Laminar Premixed Methane/Air Flames at Various Pressures, 115: 104
Measured Flame Structure and Kinetics in a Fuel-Rich Ethylene Flame, 113: 333
Measurements of the Concentrations of Free Hydrogen Atoms in Flames from

Observations of Ions: Correlation of Burning Velocities with Concentrations of Free Hydrogen Atoms, 115: 241
Mild Oxidation Regimes and Multiple Criticality in Nonpremixed Hydrogen–Air Counterflow, 112: 457
Modeling of Chromium Combustion in Incineration: Thermochemistry of Cr-C-H-Cl Combustion in Air and Selection of Key Reactions, 113: 498
Net Rate Analysis Method for Assessment and Improvement of Flame Models, 112: 371
NO_x Mechanisms in Rich Methane–Air Flames, 114: 103
A Numerical Study of a Two-Dimensional H_2-O_2-Ar Detonation Using a Detailed Chemical Reaction Model, 113: 147
On the Relative Contribution of Acetylene and Aromatics to Soot Particle Surface Growth, 112: 270
A Rate-Controlled Constrained-Equilibrium Thermochemistry Algorithm for Complex Reacting Systems, 115: 66
Rate–Ratio Asymptotic Analysis of Inhibition of Nonpremixed Methane–Air Flames by CF_3Br, 112: 418
Structure and Acoustic-Pressure Response of Hydrogen–Oxygen Diffusion Flames at High Pressure, 115: 299
Structure and Propagation of Methanol–Air Triple Flames, 114: 231
Treating Chemistry in Combustion with Detailed Mechanisms—*In Situ* Adaptive Tabulation in Principal Directions—Premixed Combustion, 112: 85
Velocity and Thermal Structure and Strain-Induced Extinction of 14 to 100% Hydrogen–Air Counterflow Diffusion Flames, 112: 575

37. KINETICS AND/OR REACTION MECHANISMS: OVERALL
Computer-Aided Derivation of Gas-Phase Oxidation Mechanisms: Application to the Modeling of the Oxidation of *n*-Butane, 114: 81
Gas-Phase Pyrolysis of Diisopropyl Methylphosphonate, 115: 230
Incorporation of Parametric Uncertainty into Complex Kinetic Mechanisms: Application to Hydrogen Oxidation in Supercritical Water, 112: 132
Ketohydroperoxides and Ignition Delay in Internal Combustion Engines, 112: 278
A Kinetic Model of Carbon Burnout in Pulverized Coal Combustion, 113: 181
Net Rate Analysis Method for Assessment and Improvement of Flame Models, 112: 371
Optimization of Rate Coefficients for Simplified Reaction Mechanisms with Genetic Algorithms, 113: 119
Pdf Modeling of Finite-rate Chemistry Effects in Turbulent Nonpremixed Jet Flames, 115: 210
A Quasi-Global Mechanism for Oxidation of Fuel Oil and the Laminar Flame Data Library, 113: 615
Structure and Acoustic-Pressure Response of Hydrogen–Oxygen Diffusion Flames at High Pressure, 115: 299
Study of Autoignition of Natural Gas in Diesel Environments Using Computational Fluid Dynamics with Detailed Chemical Kinetics, 113: 289
Theory of Radical-Induced Ignition of Counterflowing Hydrogen versus Oxygen at High Temperatures, 112: 242

38. POLLUTANTS: INORGANICS AND SOOT
A Burner-Type Trap for Particulate Matter From a Diesel Engine, 114: 585
Calibration and Correction of Laser-Induced Incandescence for Soot Volume Fraction Measurements, 112: 485
A Comparative Study of the Kinetics of Benzene Formation from Unsaturated C_2 to C_4 Hydrocarbons, 113: 620
Determination of the Soot Volume Fraction in an Ethylene Diffusion Flame by Multiwavelength Analysis of Soot Radiation, 115: 253
Dynamic Modeling of Soot Particle Coagulation and Aggregation: Implementation with the Method of Moments and Application to High-Pressure Laminar Premixed Flames, 114: 484
Emissions Reduction and Pyrolysis Gas Destruction in an Acoustically Driven Dump Combustor, 113: 249
Formation of Twisted AB-Graphitic and Fullerene- Related Tubular Structures During Soot Deposition from the Flaming Combustion of Polymers, 114: 591

Mapping of Soot Particles in a Weakly Sooting Diffusion Flame by Aerosol Techniques, 115: 276
Modeling of Chromium Combustion in Incineration: Thermochemistry of Cr-C-H-Cl Combustion in Air and Selection of Key Reactions, 113: 498
Pyrometric Determination of Temperature in Rich Flames and Wavelength Dependence of Their Emissivity, 114: 359
Soot and PAH Production from Spray Combustion of Different Hydrocarbons Behind Reflected Shock Waves, 112: 359
Soot Formation in Counterflow Ethylene Diffusion Flames from 1 to 2.5 Atmospheres, 113: 264
Soot Formation in Laminar Premixed Methane/Oxygen Flames at Atmospheric Pressure, 115: 195
Soot Formation in Methane/Air Nonpremixed Flames Doped with Small Quantities of C3 Hydrocarbons, 112: 545
Soot Microstructure in Steady and Flickering Laminar Methane/Air Diffusion Flames, 112: 473
Soot Morphology in a Liquid-Fueled, Swirl-Stabilized Combustor, 112: 312
Soot Precursor Carbonization: Visualization Using LIF and LII and Comparison Using Bright and Dark Field TEM, 112: 607
Species and Soot Concentration Measurements in a Methane/Air Nonpremixed Flame Doped With C4 Hydrocarbons, 115: 81
A Study of Coupled Turbulent Mixing, Soot Chemistry, and Radiation Effects Using the Linear Eddy Model, 113: 454
Synergistic Effect of Ethylene–Propane Mixture on Soot Formation in Laminar Diffusion Flames, 114: 370
Temperature Measurements of Optically Non-Gray Particles in High-Temperature Dusty Media, 115: 364

39. POLLUTANTS: NO_X
CH-Radical Concentration Measurements in Fuel-Rich $CH_4/O_2/Ar$ and $CH_4/O_2/NO/Ar$ Mixtures Behind Shock Waves, 113: 624
Control of NO_x Emissions in Confined Flames by Oscillations, 113: 13
Correlations for the Laminar-Burning Velocity of Methane/Diluent/Air Mixtures Obtained in Free-Fall Experiments, 114: 546
Emissions Reduction and Pyrolysis Gas Destruction in an Acoustically Driven Dump Combustor, 113: 249
Evidence for a New Way of Producing NO via NNH in Fuel-Rich Flames at Atmospheric Pressure, 114: 274
Hydrogen/Nitrous Oxide Kinetics—Implications of the $_NH_Y$ Species, 112: 302
Influence of HCl on the Homogeneous Reactions of CO and NO in Postcombustion Conditions—A Kinetic Modeling Study, 113: 579
Influence of Pressure on the Heterogeneous Formation and Destruction of Nitrogen Oxides during Char Combustion, 112: 33
Kinetic Modeling of Hydrocarbon/Nitric Oxide Interactions in a Flow Reactor, 115: 1
Laser-Saturated Fluorescence Measurements of Nitric Oxide in Laminar Counterflow Diffusion Flames, 113: 473
Measurements of Gas Concentrations in a Fluidized Bed Combustor Using Laser-Induced Photoacoustic Spectroscopy and Zirconia-Cell Probes, 113: 477
Nitric Oxide Emissions from Laminar Diffusion Flames: Effects of Air-side versus Fuel-side Diluent Addition, 113: 66
NO_x Mechanisms in Rich Methane–Air Flames, 114: 103
Numerical Modeling of NO Formation in Laminar Bunsen Flames—A Flamelet Approach, 114: 420
On NO_x Emissions from Turbulent Propane Diffusion Flames, 112: 221
A Parametric Study of NO_2 Emission from Turbulent H_2 and CH_4 Jet Diffusion Flames, 112: 188
Performance Characteristics of the Novel Low-NO_x CGRI Burner for Use With High Air Preheat, 115: 93
Scaling Laws for NO_x Emission Performance of Burners and Furnaces from 30kW to 12 MW, 114: 54
Stochastic Modeling of CO and NO in Premixed Methane Combustions, 113: 135
Study of Ammonia Removal from Coal-Gasified Fuel, 114: 246
Trends of NO Formation in Low-Temperature Hydrocarbon Flames, 112: 275

A Turbulent Jet Chemical Reaction Model: NO_x Production in Jet Flames, 114: 319

40. POLLUTANTS: OTHER
Benzene Formation from the Flow Reactor Oxidation of Methyl *t-Butyl* Ether, 115: 262
A Burner-Type Trap for Particulate Matter From a Diesel Engine, 114: 585
Correlations for the Laminar-Burning Velocity of Methane/Diluent/Air Mixtures Obtained in Free-Fall Experiments, 114: 546
Laboratory Generation of Free Chlorine from HCl under Stratospheric Afterburning Conditions, 112: 210
Polycyclic Aromatic Hydrocarbon Formation in Opposed Flow Diffusion Flames of Ethane, 114: 259
Scaling Laws for NO_x Emission Performance of Burners and Furnaces from 30kW to 12 MW, 114: 54
Stochastic Modeling of CO and NO in Premixed Methane Combustions, 113: 135

41. PROPELLANTS: PYROTECHNICS AND EXPLOSIVES
CO_2 Laser-Induced Combustion of Ammonium Dinitramide (ADN), 114: 515
Direct Numerical Simulation for Turbulent Reacting Flows (Book Review), 113: 277
Effects of Pressure and Oxygen Concentration on Ignition and Combustion of Boron in Oxygen/Nitrogen Mixture Streams, 113: 380
An Eigenvalue Method for Computing the Burning Rates of HMX Propellants, 115: 406
Importance of Non-Fourier Heat Conduction in Solid- Phase Reactions, 112: 329
The Solubility of Oxygen in Liquid Iron Dioxide During the Combustion of Iron Rods in High-Pressure Oxygen, 113: 27
Steady Deflagration of HMX With Simple Kinetics: A Gas Phase Chain Reaction Model, 114: 556
Thermal Decomposition of Energetic Materials 71: Structure-Decomposition and Kinetic Relationships in Flash Pyrolysis of Glycidyl Azide Poymer (GAP), 112: 533
Thermal Decomposition of Energetic Material 72: Unusual Behavior of Substituted Furazan Compounds Upon Flash Pyrolysis, 114: 569
Thermal Decomposition of Energetic Materials 73:Identity and Temperature Dependence of "Minor" Products From Flash-Heated RDX, 115: 417

42. PYROLYSIS AND THERMAL DECOMPOSITION
Emissions Reduction and Pyrolysis Gas Destruction in an Acoustically Driven Dump Combustor, 113: 249
Formation of Twisted AB-Graphitic and Fullerene- Related Tubular Structures During Soot Deposition from the Flaming Combustion of Polymers, 114: 591
Gas-Phase Pyrolysis of Diisopropyl Methylphosphonate, 115: 230
Thermal Decomposition of Energetic Materials 71: Structure-Decomposition and Kinetic Relationships in Flash Pyrolysis of Glycidyl Azide Poymer (GAP), 112: 533
Thermal Decomposition of Energetic Material 72: Unusual Behavior of Substituted Furazan Compounds Upon Flash Pyrolysis, 114: 569
Thermal Decomposition of Energetic Materials 73:Identity and Temperature Dependence of "Minor" Products From Flash-Heated RDX, 115: 417

43. RADIATION SPECTRA AND EXCITED SPECIES
Chemiluminescence from the Reactions of Ba[6s5d(^3D_J)] with CF_3Br and CF_2BR_2 Including Branching Ratios into the Electronic States BaBr($A^2\Pi_{1/2}$, $A^2\Pi_{3/2}$, $B^2\Sigma^+$) following the Pulsed Dye-Laser Excitation of Atomic Barium, 113: 566
Determination of the Soot Volume Fraction in an Ethylene Diffusion Flame by Multiwavelength Analysis of Soot Radiation, 115: 253
Effect of Radiative Heat Loss on Diffusion Flames in Quiescent Microgravity Atmosphere, 115: 372
Structure and Extinction of Methane–Air Flamelet with Radiation and Detailed Chemical Kinetic Mechanism, 112: 445
A Study of Coupled Turbulent Mixing, Soot Chemistry, and Radiation Effects Using the Linear Eddy Model, 113: 454

Temperature Measurements of Optically Non-Gray Particles in High-Temperature Dusty Media, 115: 364

44. SMOLDERING AND LOW TEMPERATURE OXIDATION

45. THERMOCHEMISTRY AND THERMODYNAMICS
Modeling of Chromium Combustion in Incineration: Thermochemistry of Cr-C-H-Cl Combustion in Air and Selection of Key Reactions, 113: 498
Phases of Titanium Combustion in Air, 112: 522
A Rate-Controlled Constrained-Equilibrium Thermochemistry Algorithm for Complex Reacting Systems, 115: 66

46. TRANSPORT OF HEAT AND MASS
Effect of Radiative Heat Loss on Diffusion Flames in Quiescent Microgravity Atmosphere, 115: 372
Effects of the Lewis Number of Water Vapor on the Combustion and Extinction of Methanol Drops, 112: 113
Estimates of Liquid Species Diffusivities from Experiments on Reduced-Gravity Combustion of Heptane–Hexadecane Droplets, 113: 507
Gas-Phase Radiative Effects on the Burning and Extinction of a Solid Fuel, 112: 231
Phases of Titanium Combustion in Air, 112: 522
Structure and Extinction of Methane–Air Flamelet with Radiation and Detailed Chemical Kinetic Mechanism, 112: 445

47. HIGH TEMPERATURE SYNTHESIS
